MADE IN FINLAND

Woodio products are manufactured in Finland at Woodio's own factory in Lahti. The Association for Finnish Work has awarded all Woodio products the Key Flag symbol in recognition of products made in Finland. We have also been awarded the Design from Finland mark that is awarded to companies that have contributed to Finnish design. We are proud to carry these awards as a symbol of Finnish work, design and craftmanship.

MADE IN FINLAND

DESIGN FROM F:NLAND

DESIGN DEED OF THE YEAR 2019

STANDARDS COMPLIANT

Complies with EU sanitary appliances standard (EN14688).
Woodio basin can be installed in bathrooms used domestically and commercially.
Can be disposed as energy waste.

CARE INSTRUCTIONS

If necessary, clean with a water dampened soft cloth and a mild non-abrasive dish detergent or soap. Do not use steel wool, hard or sharp tools which can scratch the surface of the sink.

For detailed care and maintenance instructions see page 20.

⚠ Use the template, in the package, to help you with the right installation dimensions.

Note! Before drilling holes in the wall, ensure that there are no water or gas pipes or electrical wires at the drilling site. There are electronic detectors specifically designed for locating pipes and wires inside the wall. The brackets that come with the Woodio basin are intended for stone and concrete walls. Thin-walled structures such as plasterboard require their own type of fasteners.

GENERAL INFORMATION ABOUT WOODIO MATERIAL

The Woodio material is a waterproof wood composite with a dirt-repellent coating, making it easy to keep clean. A small amount of mild detergent is enough to keep the material clean, saving both chemicals and Nature.

REGULAR CLEANING AND CARE

For daily cleaning, we recommend a mild soap solution and a soft cleaning cloth, allowing you to easily wipe most common stains. We recommend the use of neutral cleaning agents with a pH value between 6 and 8.

Do not use strongly alkaline or acidic cleaning agents, as they may damage the surface. If a strong substance gets on the surface of the product, rinse it off immediately and dry the surface with a clean cloth. Do not use steel wool, hard or sharp tools that may damage the surface.

After cleaning with soap or cleaning solution, rinse the material surface thoroughly with clean water and dry the surface with a clean and dry cloth. It is not recommended to let detergent dry on the material, as residue build-up can dull the surface over time.

Please note that dirt, toothpaste or chalk stains can be more visible on dark coloured surface. This may require more frequent cleaning. By wiping visible stains daily after use, you keep your Woodio product beautiful and make maintenance easier.

REPAIR

Woodio material can be repaired and the surface of the material treated, in case damages occur. However, the feasibility of the repair need to be evaluated case by case - please contact Woodio Customer Service for assistance and more information.

If you are unsure about the suitability of a cleaning agent for the surface of your Woodio product, or if you have any other questions regarding cleaning and maintenance, don't hesitate to contact us. We're always happy to help!

WOODIO CUSTOMER SERVICE

woodio@woodio.fi or +358 50 478 2944

Yes, it's wood.
